Blackboard

www.blackboard.com

We're reimagining education to create a world inspired to learn.

Blackboard is a leading provider of Internet software and services dedicated to enriching the e-learning experience for educators and students. We achieve this distinction because our people are creative and energetic, thriving on innovation, and passionate about making a difference in the evolution of education.

We're shaping the future of education with big ideas that challenge conventional thinking and advance new models of learning. Every day we're inspiring people to find new ways to learn, connect and drive change in the way education is delivered and experienced. Through technology and services we bring people closer to the knowledge they seek and to ways they can change their own education and the world for the better.

Blackboard 致力于为中国教育市场提供全球领先的在线教育服务，依托在网络运营服务和在线教育技术平台及资源上的强大优势，为各类学校和教育培训机构提供拓展性极强的在线教育软件系列和全套服务解决方案。目前已为近 300 家中国用户提供产品和服务，涉及高等教育、基础教育、职业教育以及企业培训等各个方面。

作为一家高速发展的高科技企业，公司拥有一支年轻的企业团队，积极向上、敬业的企业文化氛围。伴随公司业务的快速增长，我们一直在寻找有志于寻求个人职业飞速发展的优秀人才，并为其提供具有竞争力的计划、培训机会以及更多激动人心的挑战和机会。真诚欢迎大学本科或研究生在读的在校学生加入到我们实习生的行列中来。

Location: China- Shanghai

Job Category: Product Development

Blackboard is hiring undergraduate and graduate students for internship opportunities in our Shanghai R&D Center. We look for demonstrated technical and leadership capabilities and the ability to contribute to a team atmosphere. Applicants should also possess good communication skills, strong computing skills and a goals-oriented mindset.

POSITION RESPONSIBILITIES

The essential responsibilities/duties of the PD intern may include but will not be limited to:

*Building master prototypes and screenshot libraries (requires HTML and CSS and Java/JavaScript).
*Analysis of metrics detailing our new development processes in terms of baseline vs. actual LOE for engineering work.
*Data gathering and analysis for Product Management software acquisition
*Building, design and revise team wiki pages for new releases and engineering processes.
*Capturing data and developing repository of best practices for client engagement.
*Designing JAVA tools to incorporate into the Bb Assist automation framework and tests in Java.
*Building scripts to enhance and automated server setup for testing cycles.
*Converting work products from legacy systems like Perforce into new tools like Silk Central.
*Building block development (new or updates to existing).
*Creating of unit tests.
*Performing other related tasks as appropriate.

QUALIFICATIONS

*The successful candidate should have the following qualifications:
*Working knowledge of programming concepts and familiarity with an object oriented programming language such as JAVA.
*Working knowledge of HTML and Cascading Style Sheets (CSS).
*Working knowledge of Microsoft Office suite.
*Excellent written and oral communication skills.
*Good analytical and organizational skills.
*Ability to function in a fast-paced collaborative work environment.
*Excellent team player.
